Bilel Arfaoui

CYBERSECURITY STUDENT | TECHNICAL SPECIALIST

Nabeul, Tunisia +216 51 028 799 arfaouibilel@proton.me bilelarfaoui.github.io linkedin.com/in/bilelarfaoui

PROFILE

IT graduate and Cybersecurity Master's candidate with hands-on experience in firewalling, virtualized Windows infrastructure, deployment automation, and monitoring and log aggregation. Currently resolving escalated incidents for clients across the MEA region. Seeking an end-of-study internship in network security, systems hardening, security monitoring, cloud, or DevOps.

EXPERIENCE

Technical Specialist — Epayworldwide

Remote · Aug 2023 – Present

- Provide advanced technical support for MEA region clients, managing complex system escalations beyond standard helpdesk scope.
- Communicate effectively to resolve operational inquiries and technical incidents.
- Resolve client issues promptly to meet expected response and resolution timeframes.

Systems & Infrastructure Intern — Tunisair

Hybrid · Mar 2023 – May 2023

- Built a highly available virtualized pre-production environment for an Operational Center on VMware vSphere and Windows Server.
- Automated Windows image preparation and silent application deployment with PowerShell, MDT, and WDS.
- Supported operations with pfSense firewalling, WSUS patch management, and Zabbix monitoring.

DevOps & Monitoring Intern — Medis

Hybrid · Jan 2022 – Feb 2022

- Built Grafana dashboards on InfluxDB, with Telegraf collecting system metrics.
- Set up centralized log aggregation and shipping with Loki and Promtail.

Software Development Intern — Netinfo

Hybrid · Aug 2021 – Sep 2021

- Contributed to a Django-based chatbot using ChatterBot for automated responses.
- Used Torch, NumPy, and NLTK as part of the chatbot and natural-language-processing work.

ACADEMIC AND PERSONAL PROJECTS

- **Securing IT Infrastructure with pfSense** (Oct–Dec 2022): GNS3 lab with log, web, DNS, file, and VoIP servers protected by pfSense.
- **Dockerized IT Services & Nagios Monitoring** (Mar–May 2022): containerized FTP, Hadoop, MySQL, and web services, monitored with Nagios.
- **High-Availability Load Balancer** (Mar–Apr 2022): synchronized Apache servers with load balancing and Zabbix monitoring.

TECHNICAL SKILLS

Security & Networking: pfSense, Wireshark, Snort, system hardening, network security

Systems & Virtualization: Linux (Debian/Ubuntu), Windows Server, WDS, WSUS, MDT, VMware vSphere, OpenStack

Monitoring & Logging: Grafana, InfluxDB, Telegraf, Loki, Promtail, Nagios, Zabbix

Automation & DevOps: Docker, Git, GitHub Actions, PowerShell, Bash, Nginx, Apache

Programming & Web: Python, JavaScript, Django, PHP, MySQL, NoSQL, C

EDUCATION

- **Master's in Cybersecurity**, Leaders University, Nabeul — in progress
- **Bachelor's Degree in IT (Networking and IT Services)**, ISET Nabeul — 2020–2023
- **Baccalaureate in Computer Science**, Mahmoud Mesaadi High School — 2016–2020

CERTIFICATIONS

- **AWS Cloud Quest: Cloud Practitioner**, AWS — Apr 2026
- **Certified Cybersecurity Educator (CCEP)**, Red Team Leaders — Mar 2026
- **Encryption & Cryptography (CECB)**, Red Team Leaders — Feb 2026
