ABOUT ME

Highly motivated IT Graduate specializing in systems administration, network hardening, and security monitoring. Currently completing a Master's degree in Cybersecurity and actively seeking a challenging End-of-Study (EOS) / Graduation project. Experienced in virtualized infrastructure, automated deployments, and technical support across international environments.

PROFESSIONAL EXPERIENCE

Technical Specialist — EPAY

Aug 2023 – Present | Remote

- Diagnose complex technical issues and provide rapid, specialized technical support for MEA regional clients.
- Communicate effectively in professional English to resolve software and operational inquiries with high efficiency.
- Maintain systems stability and resolve client issues promptly to meet expected SLA targets.

Systems & Infrastructure Intern — Tunisair

Mar 2023 – May 2023 | Hybrid

- Deployed a highly available virtualized pre-production environment for an Operational Center using **VMware vSphere** and **Windows Server**.
- Automated custom Windows image captures and silent installations using **PowerShell**, MDT, and WDS.
- Hardened network infrastructure with **pfSense Firewall**, **WSUS** patching, and **Zabbix** monitoring.

DevOps / Systems Monitoring Intern — NetInfo

Jan 2022 – Feb 2022 | Remote

- Implemented an end-to-end observability stack using **Grafana** and **InfluxDB** time-series database.
- Configured **Telegraf** metrics collection, **Loki** log aggregation, and **Promtail** shipping agents.

ACADEMIC & PRACTICAL PROJECTS

Securing IT Infrastructure with pfSense

Oct 2022 – Dec 2022

- Implemented full network infrastructure on **GNS3** deploying Log, Web, DNS, File, and VoIP servers protected by pfSense.

Dockerized IT Services & Nagios Monitoring

Mar 2022 – May 2022

- Containerized FTP, Hadoop cluster, MySQL, and web services via Docker, supervised with Nagios.

High Availability Load Balancer

Mar 2022 – Apr 2022

- Ensured High Availability for web services using synchronized Apache server clusters with load balancing and Zabbix monitoring.

TECHNICAL SKILLS

Systems & Virtualization:	Linux (Debian/Ubuntu), Windows Server (WDS/WSUS/MDT), VMware vSphere, OpenStack, Docker
Security & Networking:	pfSense Firewall, Wireshark, Snort, System Hardening, Zabbix Monitoring
Observability & Tools:	Grafana, InfluxDB, Telegraf, Loki, Promtail, Git, GitHub Actions, Nginx, Apache
Programming & Scripting:	Python, Bash, PowerShell, JavaScript, Django, HTML/CSS, PHP, MySQL, NoSQL, C

CERTIFICATIONS

AWS Cloud Quest: Cloud Practitioner

Amazon Web Services (Apr 2026)

Certified Cybersecurity Educator (CCEP)

Red Team Leaders (Mar 2026)

Encryption & Cryptography (CECB)

Red Team Leaders (Feb 2026)

EDUCATION & LANGUAGES

Master in Cybersecurity (In Progress)

Seeking End-of-Study Project

Bachelor Degree in IT

ISet Nabeul (2020 – 2023)

Arabic: Native

French: Proficient

English: Fluent

German: Basic
